

**16<sup>th</sup> annual FLC symposium “Savings and Investments Union (SIU)”, 6 February 2026*****The future of financial law in Europe: the impact of the Savings and Investments Union (SIU)***

Against the backdrop of rising geopolitical tensions and the authoritative reports by Mario Draghi and Enrico Letta on the EU’s deteriorating competitive position vis-à-vis other power blocs such as China and the US, the European Commission has launched several legislative initiatives to bring about a competitive, innovative, digital and fully integrated Savings and Investments Union (SIU). Will it be enough or is it a case of too little, too late? This symposium critically discusses the impact of the SIU on EU financial law and the impact of parallel endeavors on UK financial law, and what the EU and the UK can learn from one another.

**Program**

- 12.30 pm Reception
- 13.00 pm **Welcome by the host – some reflections on SIU**
